

YOUR JOURNEY STARTS WITH US

Family owned and operated, Van Cruiser Caravans has earned its reputation for building superior quality caravans, backed up with exceptional service and customer support.

Our practical knowledge gained from using our caravans off road, combined with our passion and commitment to our product ensure that the construction process of each van is at the highest standard. Our dedicated team of builder are qualified and skilled in their trades and their attention to detail and exceptional craftsmanship is evident in the finished product.

As off road specialists, we ensure that the chassis, suspension and construction of the caravan are built to withstand Australia's rugged terrain. Another important factor for your off road caravan is the 12V system which allows you to run independently and efficiently when access to power is not available. We offer many solutions that can be tailored to your specific travel needs with our charging system that are set up with lithium batteries, inverters and roof mounted solar panels.

OFF ROAD CARAVANS

COMPACT POWERHOUSES

UNMATCHED OFF-ROAD CAPABILITY

CRUISEMASTER™

Cruisemaster ATX is the very best possible suspension to go under your caravan. Designed from the ground up by the Cruisemaster in-house engineering team, this system screams performance wherever you look. The ATX suspension is built for a lifetime of adventures, and you will stress less with a heavy-duty build less likely to run into problems out on the tracks. A sturdy 63mm stub axle, extra-large 3.3T VC bearing combination, premium monotube dampers, and lockable toe and camber adjusters mean you can spend more time enjoying your adventures and less time dealing with overheated components and maintenance.
