

WARNING

Excessive speed and incorrect tyre pressure will damage the plumbing and exterior of caravan.

Damage or defects caused by excessive speed, hard impact, damage caused by stones and not driving to the conditions will not be covered under warranty.

Enzo Gnocato, Director, Van Cruiser Caravans

LOWER TYRE PRESSURE TO 25-35 PSI WHEN TRAVELLING ON CORRUGATED ROADS

High speed travel over 40km p/h with high tyre pressure can result in heavy vibrations and fatigue through the caravan and will cause damage. Ensure you pump the tyres back up to their normal PSI when travelling on normal roads.

DO NOT OVERLOAD YOUR DRAWERS

Overloaded drawers can cause the runners to drop

DO NOT PRESSURE WASH THE CARAVAN

High pressure can break the seals on the silicone beads around the J Mould and on the roof seals

REGULARLY SERVICE YOUR BRAKES, BEARINGS & SUSPENSION

Off Road Suspension must be serviced every 5000km's and major service every 10,000km's

PLEASE ENSURE YOU READ ALL WARRANTY BOOKLETS AND USER MANUALS WHICH HAVE BEEN SUPPLIED WITH THE CARAVAN

I have read and understand what is required for travelling off road. The information contained in this sheet has been explained to me
